Policy Statement	
<ul style="list-style-type: none">· Quality Education (SDG 4):<ul style="list-style-type: none">• Preparing distinguished students in their fields of specialization, who are leaders and productive members of their communities.• Developing scientific research capabilities and innovation.• Expanding the scope of international accreditation for the university and its academic programs, and enhancing its international reputation.• Emphasizing educational quality and curriculum development.• Fostering competitiveness in education and research.· Good Health and Well-being (SDG 3):<ul style="list-style-type: none">• Participating in conferences and workshops related to health (as evidenced by its involvement in medical conferences and workshops on issues like anti-drug campaigns).• Focusing on the well-being of students and the university community in general.•· Decent Work and Economic Growth (SDG 8) & Industry, Innovation, and Infrastructure (SDG 9):<ul style="list-style-type: none">• Developing scientific research and innovation in areas of national and international importance.	

- **Developing students' capabilities to be productive members of their communities, supporting economic growth.**
- **Cultivating a culture of innovation within the institutional work environment.**

· Sustainable Cities and Communities (SDG 11) & Climate Action (SDG 13):

- **Recognizing the university's responsibility for the environmental impacts of its activities.**
- **Setting specific goals to regulate procedures for environmental preservation and mitigating the impacts of its activities, making the university environment eco-friendly.**
- **Participating in awareness activities and workshops on environmental sustainability and climate change.**

· Partnerships for the Goals (SDG 17):

- **Entering into twinning agreements and scientific cooperation with other universities (such as Babylon University).**
- **Enhancing the university's role in producing and transferring knowledge and skills to serve the community.**
- **Participating in international and local events and seminars to exchange expertise and knowledge.**

Overall, Al-Ma'moun University aims to achieve the Sustainable Development Goals by:

1. **Integrating sustainability concepts into curricula and scientific research.**
2. **Raising awareness of the SDGs among students, staff, and the community.**
3. **Implementing environmentally friendly practices within the university campus.**
4. **Contributing to solutions for societal, economic, and environmental problems through research and development.**
5. **Building partnerships with governmental and private institutions, and international organizations to support sustainable development efforts.**

The university considers its commitment to the SDGs an integral part of its vision and mission to be a leading educational and research institution that contributes to building a sustainable and prosperous society.
