SUSTAINABILITY BOARD

Welcome Message from the Chairman

I am honored to write these words to you as I assume my duties as Chairman of the Sustainability Council, with pride and honor for what we have achieved together so far, and with ambition for what we can achieve in the future.

Sustainability today is more than just an institutional commitment; it is a shared responsibility and a humanitarian mission that reflects our values toward the environment in which we live, the communities we serve, and the future generations to whom we entrust our legacy. At our organization, we believe that true success is measured not only by our profits, but also by the positive, sustainable impact we leave.

The Sustainability Council will work alongside all work teams to support environmental, social, and governance initiatives and develop innovative policies and practices that align with the best international standards and meet the aspirations of all stakeholders. We will also focus on raising awareness of a culture of sustainability and making it an integral part of our way of thinking and daily work.

I invite you all to be ambassadors of positive change, role models of commitment and responsibility, and to be inspired by our corporate values and our spirit of collaboration as a catalyst for our future achievements. Every idea, every effort, and every small step toward improving our environment and community makes a big difference.

I look forward to working with you (students, faculty, and partners) as a team, fully confident that we can shape a brighter and more sustainable future for our institution and the world around us.
